

*We witnessed the changes in building codes due to...*

Boston's Coconut Grove fire in 1942. These changes included advances in exit design, emergency lighting, and reductions of combustible furnishings in today's buildings.

## EXIT SIGNS AND EMERGENCY LIGHTS

## EXIT AND EMERGENCY LIGHTING TEST EQUIPMENT

The newly redesigned **BACTPLUS BATTERY TESTER** features a high-impact ABS case with a rubber holster and high-contrast, inverted blue screen. Designed to test the most common 6V (1.2 Ah–12 Ah) and 12V (1.2 Ah–100 Ah) lead acid batteries, it now provides increased accuracy and faster results. Quick and easy to use, it displays DC voltage and Ah capacity in seconds. Simply choose the battery type and then press "Test". No confusing conversion rates to worry about either—you get the battery's DC voltage followed by the actual Ah capacity. Other features include, increased calibration control protection, reinforced input sockets, and improved max input voltage protection with warning LED. Plus the **BACTPLUS** does not deplete the battery like conventional load testers.

P/N	DESCRIPTION
BACTPLUS	6V/12V Battery Tester

For exit sign and emergency light service testing, **Brooks'** line of **BATTERY ANALYZERS** also check charging circuitry. Equipped with leads.

P/N	DESCRIPTION
BBA64	4V/6V Analyzer (Up to 24 Ah)
BBA612	6V/12V Analyzer (Up to 24 Ah)
BBAC	Compact Carry Case
BBLEADS	For Analyzer Replacement Leads For Brooks Battery Analyzers

The **NON-CONTACT VOLTAGE PROBE** is designed for safety and limited troubleshooting with its three-way voltage alert—beeps, lights, and vibrates. It uses a non-contact method of AC voltage testing and determines if AC voltage is present without touching wires or opening lock nuts. Totally insulated, the **Voltage Probe** has no exposed metal or conductive parts and is CAT IV rated 1000 VAC.

P/N	DESCRIPTION
VP600SB	Non-Contact Voltage Probe

**Brooks' MULTI-METER** is a versatile and compact unit that will measure both AC and DC current and determine continuity of lamps. Unit also has a display locking feature.

P/N	DESCRIPTION
DM73C	Compact Multi-Meter

Use either the non-conductive plastic **EMERGENCY LIGHT TEST BUTTON PICK** or heavy-duty glass **STRAPPING TAPE** to engage and hold down the test button on exit and emergency lights.
